Kaycan

Over 50 Years of Excellence in Building Solutions

Founded in 1974, Kaycan is a leading Canadian manufacturer and distributor

of exterior building materials. From our headquarters in Pointe-Claire, Quebec, we've built a strong reputation for quality and innovation across Canada and the United States. The company has steadily grown since its founding, establishing a strong industry presence.

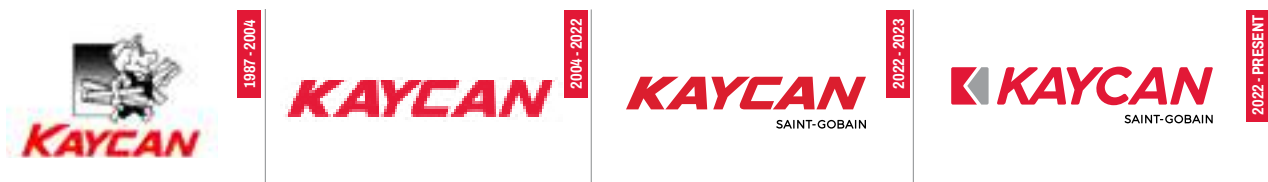

As one of the world's top producers of vinyl and aluminum siding, rainware, and coil products, Kaycan operates eight manufacturing facilities across Canada. Each facility adheres to rigorous quality control and testing standards, exceeding the most stringent industry and government requirements. With 30 distribution centers strategically located in major cities, we're always ready to meet our customers' needs.

A History of Growth and Innovation

Kaycan began as an aluminum manufacturer and quickly expanded its offerings to include vinyl siding and a variety of innovative materials. Key milestones in our growth include:

- 1974:** Began the production of aluminum siding and trims
- 1987:** Launched vinyl siding manufacturing
- 2004:** Entered the vinyl gutter market with the acquisition of Plastmo
- 2008:** Expanded into engineered wood siding
- 2014:** Broadened our portfolio to include windows and patio doors.

Kaycan

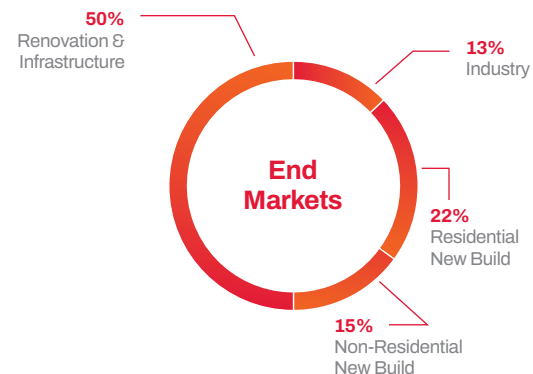

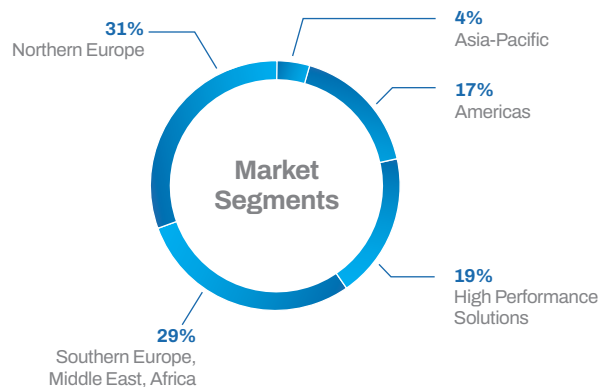

A Division of Saint-Gobain

In 2022, Kaycan was acquired by Saint-Gobain S.A., a global leader in lightweight and sustainable construction, enhancing its presence in the North American market. This strategic acquisition has expanded Kaycan's expertise and influence, aligning with Saint-Gobain's commitment to sustainability and innovation.

Saint-Gobain Overview

Founded	Global Presence	Sales outlets
Over 350 years ago	Operating in 76 countries	2,700 Outlets in Europe
Manufacturing Facilities	Employees	R&D Centers
900 worldwide	Approximately 160,000	8 cross-business centers

Saint-Gobain: A Diverse Range of Solutions for Housing and Construction Markets

Saint-Gobain offers a comprehensive suite of solutions for the housing and construction markets, including:

- Façades
- Technical Markets
- Partitions
- Ceilings
- Flooring
- Millwork and Windows
- Interior Finishing and Decoration
- Landscaping
- Shelling and Infrastructure
- Drinking Water Supply and Sanitation

Kaycan's Continued Leadership

Kaycan continues to be a respected name in the industry, renowned for its dedication to quality, innovation, and exceptional customer service. By combining Kaycan's expertise with Saint-Gobain's global reach and resources, the future of sustainable building solutions is brighter than ever.

About Saint-Gobain

Saint-Gobain is a global leader in lightweight and sustainable construction,

driven by a vision to create better living spaces for everyone, everywhere. Operating in 76 countries with over 160,000 employees, we design, manufacture, and distribute materials and services for the construction and industrial markets.

Solutions at the Heart of Everyday Life

Our solutions are integral to daily life, enhancing buildings, transportation, infrastructure, and a wide range of industrial applications. Our products are designed to provide comfort, performance, and sustainability while addressing the key challenges of today's world, including decarbonization, resource preservation, and rapid urbanization.

Commitment to a Sustainable Future

Saint-Gobain is dedicated to creating sustainable solutions for both public and private sectors, including the renovation of buildings, lightweight construction, and the decarbonization of construction and industry. Through continuous innovation, we ensure that our products deliver both high performance and environmental sustainability.

Our Purpose

Guided by this purpose, Saint-Gobain is committed to building a sustainable future for generations to come, providing integrated solutions that help create a better, more sustainable world.

**“MAKING THE
WORLD A
BETTER HOME”**

Kaycan

Building Lasting Impressions

Unparalleled Quality

Kaycan products stand out from the competition with their superior performance, exceptional aesthetics, durability, and low maintenance. Our commitment to quality and innovation has kept us at the forefront of the North American market for vinyl and aluminum building products for more than 50 years.

State-of-the-Art Manufacturing

As a global leader in vinyl and aluminum siding and rainware, Kaycan operates eight manufacturing facilities across Canada. Our plants adhere to rigorous quality control and testing standards, exceeding the most stringent industry and governmental requirements at every stage of production.

Innovation and Technology

At Kaycan, we are dedicated to enhancing customer satisfaction through continuous improvement. We leverage cutting-edge technology and engineering to elevate the performance, durability, and ease of maintenance of our products, all while drawing inspiration from timeless craftsmanship.

Experience and Reliability

With a global presence and decades of expertise, Kaycan offers an extensive range of products supported by exceptional resources. This allows us to consistently deliver on time and to specification, meeting the needs of our customers worldwide.

Sustainable Manufacturing at Kaycan

Kaycan is a leader in eco-environmentally responsible manufacturing, producing high-quality vinyl and aluminum building products with a strong focus on sustainability. Across our eight manufacturing plants, distribution centers, and corporate offices, we have implemented stringent processes to optimize raw material usage, minimize energy consumption, and significantly reduce waste. Over 99% of materials used in our manufacturing process are recycled, demonstrating our commitment to environmental responsibility.

Committed

to a Sustainable Future

Kaycan is dedicated to refining strategies that address today's needs while safeguarding the resources of tomorrow. Our R3v[®] sustainable manufacturing program exemplifies this commitment by reducing our ecological footprint through the recycling of post-consumer vinyl siding at the end of its lifecycle.

R3V[®]: Reclaim, Regrind, Repurpose

Why Vinyl Siding is a Sustainable Choice

Lightweight

Requires less energy to transport, reducing the environmental impact of shipping.

Efficient Installation

Vinyl siding is easy to install, generates minimal waste, and requires fewer materials than other siding options.

Low Maintenance

Unlike other exterior materials, vinyl siding doesn't require painting, staining, or caulking.

Durability

Vinyl siding is one of the most long-lasting and durable siding solutions available.

VINYL SIDING AND TRIMS

Specifications and colours are subject to change without notice. The manufacturer assumes no liability for such changes. Actual colour samples should be consulted for accurate colour representation when finalizing selections.

For over 35 years, Kaycan has been manufacturing high-quality vinyl siding and trims, setting the industry standard for durability and fade resistance. Our exclusive Duratron vinyl formula delivers long-lasting performance and exceptional colour retention, maintaining optimal appearance over time.

Kaycan offers a wide range of vinyl siding profiles, from traditional double 6 in siding to rustic foam-backed vinyl log siding and polymer shakes and shingles. Each product is carefully designed to elevate exterior vinyl siding projects by enhancing both durability and aesthetic appeal.

Kaycan Technology

As a leader in the vinyl siding industry, Kaycan is committed to continuous research and development, always seeking to provide exceptional value to our customers. Our products combine timeless craftsmanship with modern engineering to deliver outstanding performance, durability and easy maintenance, regardless of weather conditions.

Kaycan vinyl siding offers a vibrant palette of colours inspired by nature. Designed for exceptional style, durability, and longevity, the complete range of trims and accessories provides a refined finishing touch for exterior applications. Whether seeking dramatic architectural flair or a subtle accent, Kaycan's trims and accessories provide a custom appearance and are the ideal finishing touch to any exterior vinyl siding projects. All Kaycan vinyl siding is backed by a limited lifetime warranty.

Latest Market Trends

Designers and industry experts forecast that bold, dark colours will dominate the exterior construction market. Leading the industry, Kaycan's DaVinci and Verona lines offer the widest selection of dark colours available. Intense sun exposure can impact any exterior spaces, causing panels to warp and fade. Darker colours pose a greater challenge, as they absorb more of the sun's rays.

Kaycan's research and development team has rigorously tested dark-coloured vinyl siding in both laboratory and field environments to address these challenges. The results confirm that its unique properties and heat-resistant capabilities are ideally suited for today's trending colour selections.

HELIOS® Technology: Superior Protection for Exterior Vinyl Siding

Intense solar heat can affect the exterior of vinyl siding, particularly with dark-coloured options. HELIOS® Technology offers advanced heat resistance, specifically engineered to address the requirements of contemporary dark colour trends in exterior vinyl siding.

Heat Distortion Performance Test

HELIOS® thermal diffusion agents offer enhanced protection against heat distortion. In tests where a heat gun was applied to Kaycan vinyl siding at 176.5°F, the siding showed no signs of distortion, proving its superior resistance to extreme temperatures.

Duratron Technology: The Industry's Most Durable Vinyl Siding

Kaycan's Duratron vinyl formulation is the cornerstone of all our vinyl siding, soffit, and accessories. This proprietary blend of premium ingredients is crafted using advanced manufacturing processes and undergoes continuous testing to ensure we deliver the most durable siding on the market.

The Formula for Enduring Beauty and Performance

- **Virgin PVC Resin:** Provides superior weatherability and strength in the surface layer.
- **Heat Distortion Agents:** Prevent warping and oil-canning from the sun's intense rays.
- **Impact Modifiers:** Ensure durability even in temperatures as low as -25°F.
- **High Pigment Saturation:** Delivers long-lasting, fade-resistant colours.
- **Stabilizers:** Protect the PVC during manufacturing, preventing brittleness, oxidation, and fading.

For Guaranteed Results

Kaycan products are backed by the most comprehensive No-Nonsense Limited Lifetime Warranty, offering exceptional protection and peace of mind:

- **High Impact Resistance:** Including protection against hail damage.
- **Weatherability:** Colour retention up to 4 Hunter units.
- **Wind Resistance:** Withstands winds up to 180 mph.
- **Temperature Resistance:** Maintains integrity from -25°F to 110°F.

- **Moisture Protection:** With a Perm rating of 5 for superior defense.
- **Stain Resistance:** Easily cleaned with a simple hose-down.
- **No Repainting Needed:** Lasting beauty is achieved without the need for ongoing maintenance.

The Perfect Blend of Tradition and Innovation

Duratron combines traditional craftsmanship with cutting-edge technology to offer the best of both worlds. This unique formula ensures top performance with meticulous attention to detail:

- **Five Decades of Craftsmanship:** Trusted expertise guarantees exceptional quality.
- **State-of-the-Art Equipment:** Delivers superior performance and consistency.
- **Fully Computerized Production:** Ensures unmatched product uniformity.
- **Rigorous Quality Standards:** Exceeds industry requirements by 75%.

Relentless Testing for Unmatched Performance

Kaycan doesn't just rely on premium ingredients and advanced manufacturing. Duratron undergoes relentless testing to ensure that each panel can withstand even the harshest conditions Mother Nature has to offer.

Colorfast : Beyond Ordinary Vinyl Colour Technology

Partnering with a global leader in acrylic technology, Kaycan has developed an advanced process that fuses a protective acrylic layer to a vinyl base. This layer provides resistance against the sun's UV rays, which can cause fading, and ensures the strength and durability required for long-term performance.

Protection Against Fading

Kaycan's exclusive Colorfast dark vinyl formula sets a new standard for colour retention across the industry. Engineered to withstand weathering effects in any exterior environment—from arctic to desert conditions—this formula ensures lasting beauty.

DAVINCI

BOLD COLOURS, TIMELESS BEAUTY

Cedar Impressions®

CEDAR IMPRESSIONS® INDIVIDUAL 5IN SHINGLES

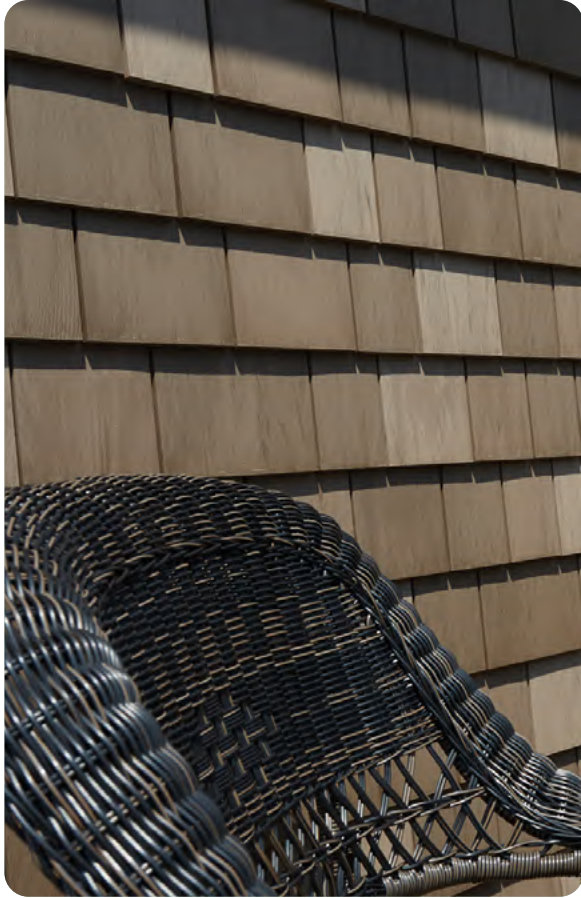

BEAUTY WITH PEACE OF MIND

Experience the charm and beauty of natural cedar shingles without the constant maintenance. Cedar Impressions® Individual 5 in Shingles offer the industry's first polymer shingles with innovative, blended colour throughout.

Cedar Impressions®

Design Flexibility

Includes seven shingle widths per box, allowing for random patterns and unique design possibilities.

Authentic Exposure

Each shingle provides a 5 in exposure for a substantial, authentic appearance.

Durable Material

Constructed from durable, injection-moulded polymer for long-lasting performance.

Weather Resistant

TrueTexture™ finish is engineered to withstand hurricane-force winds.

Effortless Installation

Installs with the ease of real cedar shingles, simplifying the process.

Low Maintenance

Virtually maintenance-free and never requires painting, ensuring long-lasting beauty.

Vibrant Colour

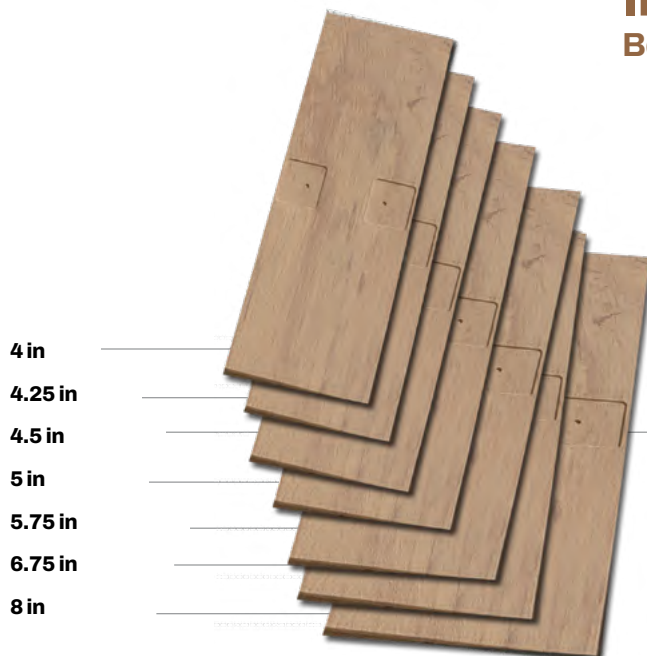

Colour is blended and infused throughout the panel for enduring vibrancy.

Lifetime Warranty

A comprehensive warranty provides long-term reliability and protection.

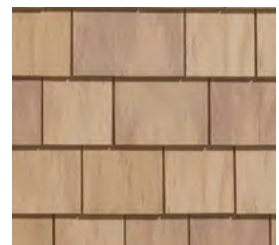

CEDAR IMPRESSIONS® INDIVIDUAL 5 IN SHINGLES

Beauty with peace of mind

7 Shingle Widths

Each box of Cedar Impressions® Individual 5 in Shingles come in 7 different widths which allow for random patterns and one-of-a-kind design. Each shingle provides a 5 in exposure.

RESTORATION MILLWORK®

PVC TRIM

↑ PVC TRIM

Vinyl siding and trims

Restoration Millwork® offers a versatile collection of PVC interior and exterior trim suitable for a wide range of projects. These durable, decorative trims offer the perfect finishing touch for transitions and other design elements. As a superior alternative to traditional wood or fiber cement, our PVC trims seamlessly complete our vinyl, aluminium, and engineered wood siding, instantly enhancing curb appeal for exterior projects.

Restoration Millwork® PVC trim boards offer a versatile solution for a wide range of trim applications, including soffits, fascias, rakes, friezes, bandboards, column enclosures, corners, and window and door surrounds.

Ready to Install

Comes in natural white and is ready for immediate installation.

UV Resistant

Highly resistant to yellowing caused by UV exposure for long-lasting beauty.

Paintable

Can be painted to complement any exterior colour palette.

Easy to Work With

Cuts and mills easily with traditional woodworking tools.

Fire Resistant

Class A (Class 1) Flame Spread Classification for enhanced safety.

Superior Quality

Excellent dimensional accuracy ensures precise installation.

Low Maintenance

Durable, long-lasting material that requires minimal upkeep.

Code Compliant

Meets ICC and CCMC code requirements.

25-Year Limited Warranty

A comprehensive warranty provides long-term reliability and protection.

Corners

Restoration Millwork® one-piece corners deliver a seamless finish for exterior trim, available in both smooth and TrueTexture™ woodgrain finishes. These versatile corners complement a variety of architectural styles and contribute to a polished appearance in exterior vinyl siding applications.

ALUMINUM

SIDING, SOFFIT, AND TRIM

Specifications and colours are subject to change without notice. The manufacturer assumes no liability for such changes. Actual colour samples should be consulted for accurate colour representation when finalizing selections.

Kaycan's aluminum siding, soffit, and trim have set the industry standard for durability, performance, and aesthetic appeal. Our products are renowned for their robust construction and timeless beauty.

Kaycan's aluminum siding and trim products utilize a one-coat system consisting of a thermosetting acrylic primer. This base coat is roller-applied and baked at high temperatures, resulting in enhanced corrosion resistance and overall performance.

Available in both smooth and textured finishes, Kaycan's aluminum siding comes with a complete line of colour-coordinated trim and accessories. We offer the widest selection of trim coil colours, utilizing proprietary technology to ensure the highest quality and selection.

ALUMINUM

TIMELESS STRENGTH AND STYLE

Kaycan aluminum siding offers timeless style and lasting protection, with smooth and textured finishes and a comprehensive line of colour-coordinated trim and accessories to perfectly match any vision. We also offer the widest selection of trim coil colours, manufactured with our proprietary technology for unparalleled quality.

ALUMINUM

Aluminum and accessories

Unmatched Durability

Guaranteed not to crack or flake.

Superior Finish

Our single-coat system, with its thermosetting acrylic primer, provides exceptional corrosion resistance and the lowest abrasion characteristic in the industry.

Versatile Design

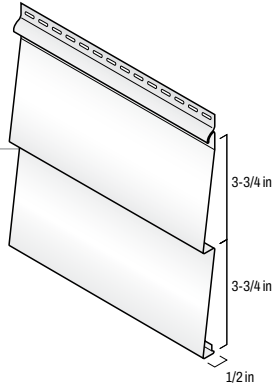

Available in smooth and woodgrain finishes in a variety of profiles and colours.

ALUMINUM COMPOSITE

HIGH PERFORMANCE DESIGN

Introducing our high-performance aluminum composite panels for exterior. This innovative solution combines durability with a modern, sleek look. Aluminum Composite panels are designed to meet stringent industry standards, providing a seamless building envelope solution for exceptional results.

ALUMINUM COMPOSITE
→ Aluminum and accessories

High-Performance Panels

Outstanding strength and aesthetic flexibility.

Cost-Effective Solutions

Efficient installation methods lead to significant labour cost savings.

Industry Standards

Aluminum Composite systems meet stringent industry standards for long-term reliability.

Custom Support

We work closely with clients from project planning to installation, ensuring tailored solutions and seamless results.

ALUMINUM COMPOSITE

High Performance Design

Fire Resistance

The panels are designed to meet the most demanding requirements of architects and building professionals. Its mineral-filled thermoplastic core ensures exceptional dimensional stability and high fire resistance.

Meets most fire classification requirements:

- CAN/ULC S-134
- UNE EN 13501, 1:2007 B-s1, d0
- PN-90/8-02867 - NRO
- NFPA 285 - PASS
- ASTM E84 – CLASS A
- Thickness: 4mm

Specially designed for the S-100 system and the application/adhesion of structural silicone.

S-100" Aluminum Composite Building Envelope System

Kaycan is proud to offer the S-100* building envelope system. The S-100 system consists of aluminum composite panels, aluminum accessories and high-quality adhesive.

This exterior cladding system is cost-effective and easy to install, and is suitable for both residential and commercial buildings. The wide range of contemporary colours and textures makes it possible to push the boundaries of architectural design.

We offer an installation system and a vast range of cladding products, as well as a complete range of products in the same colour: coils, soffits, trims and windows, etc.

*The S-100 system is patent pending.

ALUMINUM SOFFIT

ENDURING PROTECTION

↑ SOFFIT

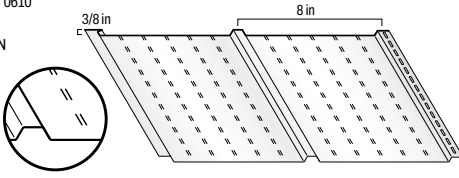

Aluminum and accessories

Soffit is an essential component of any exterior project, seamlessly combining functionality with aesthetic appeal. It plays a critical role in protecting the structure by providing ventilation to the eaves and attics, thereby preventing moisture buildup. Aluminum soffits enhance curb appeal with their sleek finishes and a variety of colour options, blending perfectly with any architectural style.

Direct contact between aluminum products and dissimilar materials, including runoff from these materials, should be avoided to prevent corrosion. Installation requires precautions to eliminate contact with corrosive substances, such as:

- Pressure-treated lumber
- Concrete
- Masonry cement
- Stucco
- Salt
- Corrosive chemicals
- Dissimilar metals (e.g., copper, zinc, steel)

RIDGEWOOD D-5™

Engineered Wood Siding and Accessories

The Ridgewood D-5™ collection showcases a traditional Dutch lap profile with intricate details and rich wood-grain texture that exudes warmth and elegance. Its exceptional durability makes it a preferred choice among professional builders, elevating the visual appeal of any project.

Key Features

- Classic Dutch lap style with Maibec CanExel™'s signature wood grain finish
- State-of-the-art installation system with hidden fasteners
- Double profile resembles two pre-assembled 5-inch boards
- Horizontal installation only
- 11 square feet coverage per 12-foot board
- Prorated 25-year limited warranty

RIDGEWOOD D-5™

Product code: 8200xx
 Package: 4 pieces per package
 Length: 12' (3.66 m)
 Coverage: 48 sq ft per package

Specifications

- Nominal Width: 12 in (30.48 cm)
- Actual Width: 11 7/8 in (30.16 cm)
- Nominal Thickness: 3/8 in (9.53 mm)
- Substrate: High-Density Wood Fibre (HDF), 960 kg/m³
- Finish: Textured

Packaging

- 4 boards per bundle
- 30 bundles per pallet
- 44 sq ft covering per package

Installation Requirements

- Install over standard maximum 16 in on-centre stud wall with OSB or plywood sheathing.
- Requires approved water-resistive barrier.
- Corrosion-resistant nails (min. 0.113 in diameter shank, 0.240 in head) are required.
- A minimum fastener penetration of 1¼ in into stud/strapping is required.
- Staples not permitted.

THE CANEXEL™ ADVANTAGE

Beautiful Finish

Maibec CanExel™ engineered siding features our exclusive premium thermoset paint. Multiple coats of this industrial-grade paint are applied and cured at extremely high temperatures to ensure superior resistance against fading, cracking, splitting and peeling.

Authentic Woodgrain Look

The wood grain patterns in Maibec CanExel™ products are never endlessly repeated. The diverse range of wood grain patterns creates a distinctive, authentic and exclusive aesthetic. When combined with the appearance of genuine wood fibre, the results exceed expectations.

Lasting Durability

Maibec CanExel™ stands as the original high-density fibre (HDF) engineered siding. Each product undergoes rigorous paint and substrate testing with prolonged exposure to UV rays, freezing temperatures and intense heat to ensure performance in extreme outdoor climates. Every board must meet strict quality standards to earn the Maibec CanExel™ name. Through rain, snow or sunshine, Maibec CanExel™ engineered siding delivers reliable performance for decades.

Warranty Protection

Maibec CanExel™ offers trustworthy warranty protection backed by over 40 years of industry expertise and a culture of commitment, responsibility and transparency.

- 25-year limited warranty against buckling, peeling, separating, and chipping
- 15-year limited warranty on the finish
- 5-year 100% warranty on labour and replacements

Engineered Wood Siding and Accessories

Accessories

Profiles and finishing accessories designed to complement CanExel™ products combine style and durability.

Prefinished treated exterior composite trim boards combine the appealing look of natural woodgrain with the lasting durability of engineered materials. Manufactured using cutting-edge techniques, these boards guarantee resistance against delamination, moisture, rot, and termites—all protected by Maibec CanExel™’s reliable limited warranty. The perfect finishing touch is provided, designed to withstand the test of time and the elements.

CanExel® Prefinished Exterior Trim

A perfect match for the colour and texture of Maibec CanExel™ engineered siding, these trims can also be used with other types of siding. MiraTEC is manufactured using the original TEC™ process, combining aesthetics, durability, and performance backed by an industry leading

50-year limited warranty. CanExel® trims combine durable wood fibers, phenolic resins, and zinc borate, offering enhanced resistance to moisture, rot and termites.

Built on:

TESTS & COMPLIANCE

Moisture resistant: As measured by ASTM D1037 for water absorption and thickness swelling

Rot resistant: Tested per AWP A E16 Field Test for Evaluation of Wood Preservatives

Termite resistant: As measured by AWP A E7 Standard Method of Evaluating Wood Preservatives

Code compliance: Evaluation report from ICC-ES (ESR-3043)

STONEfaçade®

ARCHITECTURAL STONE CLADDING SYSTEM

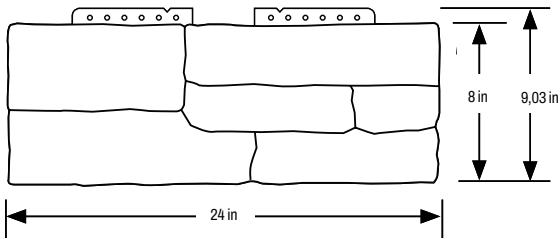

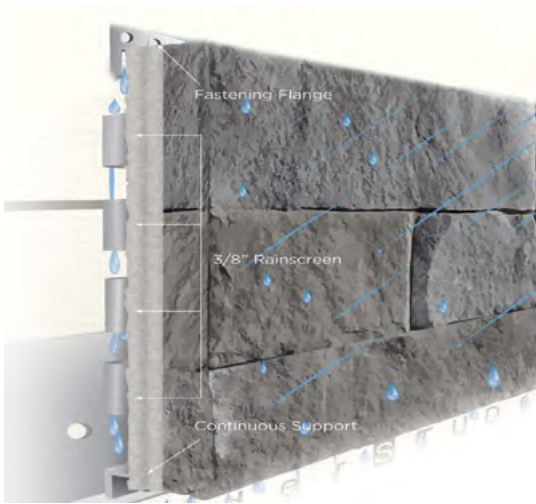

CertainTeed STONEfaçade®: Realistic Stone Aesthetics, Simplified Installation

CertainTeed STONEfaçade® is a manufactured architectural stone veneer designed to replicate the timeless beauty and craftsmanship of natural stone for exterior applications. This affordable, durable, and easy-to-install panelized system enhances both the aesthetic appeal and functionality of any property, seamlessly blending classic elegance with cutting-edge technology.

↑ STONEfaçade®

Architectural Stone

Handpicked Stone Molding

STONEfaçade® is crafted from hand-selected stones to replicate the authentic beauty of natural stone while delivering modern performance. Each panel is unique, ensuring a distinctive and long-lasting finish.

Integrated Moisture Management

Each panel includes a built-in rainscreen system for efficient top-to-bottom drainage, protecting walls from buildup and minimizing moisture-related risks.

Effortless Installation

STONEfaçade® is designed for quick and clean installation, reducing project time and costs while ensuring a professional finish.

20-Year Limited Warranty

Includes a 20-Year Limited Warranty, providing confidence and long-term protection.

Complete the Look with STONEfaçade® Accessories

The STONEfaçade® system offers a full line of matching accessories for a polished, professional finish:

Rainware Systems

Specifications and colours are subject to change without notice. The manufacturer assumes no liability for such changes. Accurate colour representation should be verified using actual colour samples during final selection.

An extensive selection of rainware systems is available crafted from durable PVC, aluminum, and steel. Each material offers distinct advantages: aluminum's lightweight and corrosion-resistant properties, steel's robust strength, and PVC's low-maintenance versatility. Our rainware systems efficiently channel water away from any exterior project, protecting its foundation and enhancing its aesthetic with a polished, cohesive look. A variety of styles and finishes provides the perfect solution to enhance and protect any building project.

PERFORMANCE

SROR Downpipe 3 meter

Product code: 6720

GROR Pipe Y

Product code: 6734
Use where two pipes join, expanded end to fit cut section of downpipe.

SHFUS Pipe Strap

Product code: 6739
Clamshell strap with single screw mount.

BK Elbow

Product code: 6721
Fits Outlet or crimped end of downpipe.

SOKN Knee Elbow

Product code: 6723
4 in offset elbow expanded end to fit cut section of downpipe.

3 in Tile Cover

Product code: 6740
Formed tile cover for downpipes entering plastic ground drains.

BKM Elbow

Product code: 6722
Expanded elbow fits cut section of downpipe.

SSVU Pipe Strap

Product code: 6733
Two units are required per downpipe length; alternatively, two #6736 screws may be used as needed.

JS 1000 Coated Gasketed Screw

Product code: 673600
Used with gutter hangers; provides 850 lbs pull force in SPF.

Colour Matched Rex Drive 1/2 in Tek Screw

Product code: 6737
Used for downpipe and elbows.

Colour Matched Gasketed Screw

Product code: 6736
Used for pipe straps and flashings; offers three times the rust protection.

RAINWARE SYSTEMS

↑ PVC

Rainware System

Kaycan's PVC Rainware Systems offer reliable protection and style with easy installation. Available in three versatile styles, our PVC rainware efficiently channels water away from structures, preventing potential damage and boosting curb appeal. Engineered for durability, low maintenance, and a seamless finish, each style comes in a range of colours to complement diverse architectural designs.

K-SNAP

The K-Snap Vinyl Rainware system exceeds stringent industry and government standards. Durable, scratch-resistant, and easy to install, it requires minimal maintenance. A fully coordinated accessories line complements the system.

Snap-Fit Design

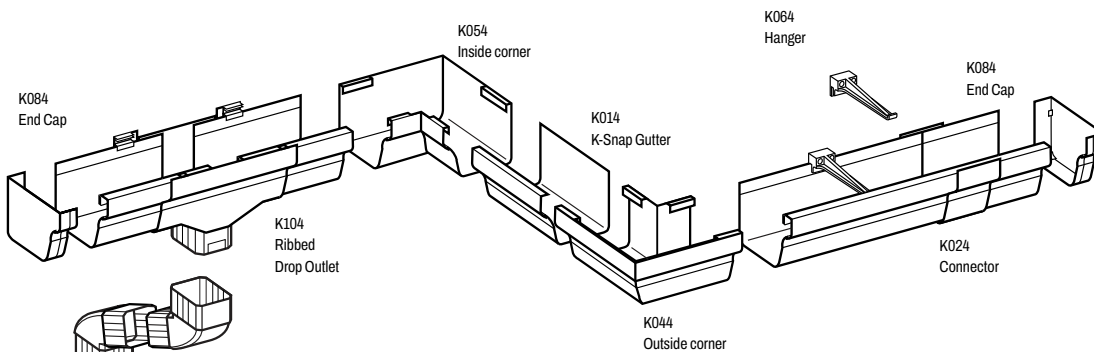

Quick and secure connections for efficient installation.

Exceptional Durability

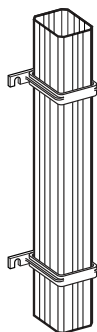

Scratch-resistant and built to withstand the elements.

Effortless Installation

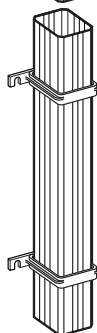

Streamlined design simplifies the installation process.

WINDOWS

Windows & Patio Doors

A stunning range of windows and patio doors is available, meticulously designed to blend beauty, durability, and cutting-edge technology. Our products are expertly crafted to infuse every room with natural light, enhance energy efficiency, and elevate any home's style. Featuring options like our high-performance Vertex3® technology, which optimizes insulation and clarity, our windows offer year-round comfort and exceptional thermal performance. From sleek casement and awning windows to versatile sliding and tilt-and-turn options, we have the perfect solution to complement any architectural design.

Why We Stand Out

Our windows aren't just built to perform—they're crafted to inspire. Each window is meticulously designed to maximize natural light, reflect your customers' unique style, and provide superior protection from the elements. We maintain rigorous quality control at every stage, ensuring our customers receive the very best we have to offer.

Our team is committed to leading the industry in energy efficiency and sustainability. These products allow clients to reduce energy bills and contribute to a greener future. Every product choice helps lower carbon footprints and aligns with a commitment to environmental responsibility.

ENERGY STAR® Certified

Our windows meet or exceed the most stringent Energy Star® standards.

INTERCEPT® ULTRA WARM-EDGE SPACER SYSTEM

The optimal combination of durability, rigidity, and thermal performance, resulting in longer-lasting and more energy-efficient windows.

ēvolv Double-Pane Glass

This proprietary technology delivers triple-pane thermal efficiency in a double-pane window by reflecting escaping heat back into the room. This increases thermal efficiency by up to 29% above the industry average,* resulting in substantial energy savings.

***Average measured from Energy Star® data of three other window manufacturers.*

ECTECH Technology

This patented technology produces cleaner, clearer windows. The titanium dioxide coating absorbs the sun's UV rays, loosening dirt particles and allowing water to rinse them away naturally. Water spots are reduced by 99%, creating crystalline glass clarity.

Premium Vinyl

Formulated for lasting beauty, our vinyl won't chip, peel, crack, or warp.

Constant Force Balance System

Ensures smooth and effortless operation (hung windows)

TRUTH™ ENCORE Folding Handle

Won't interfere with window coverings and requires 33% less effort to operate (casement & awning windows).

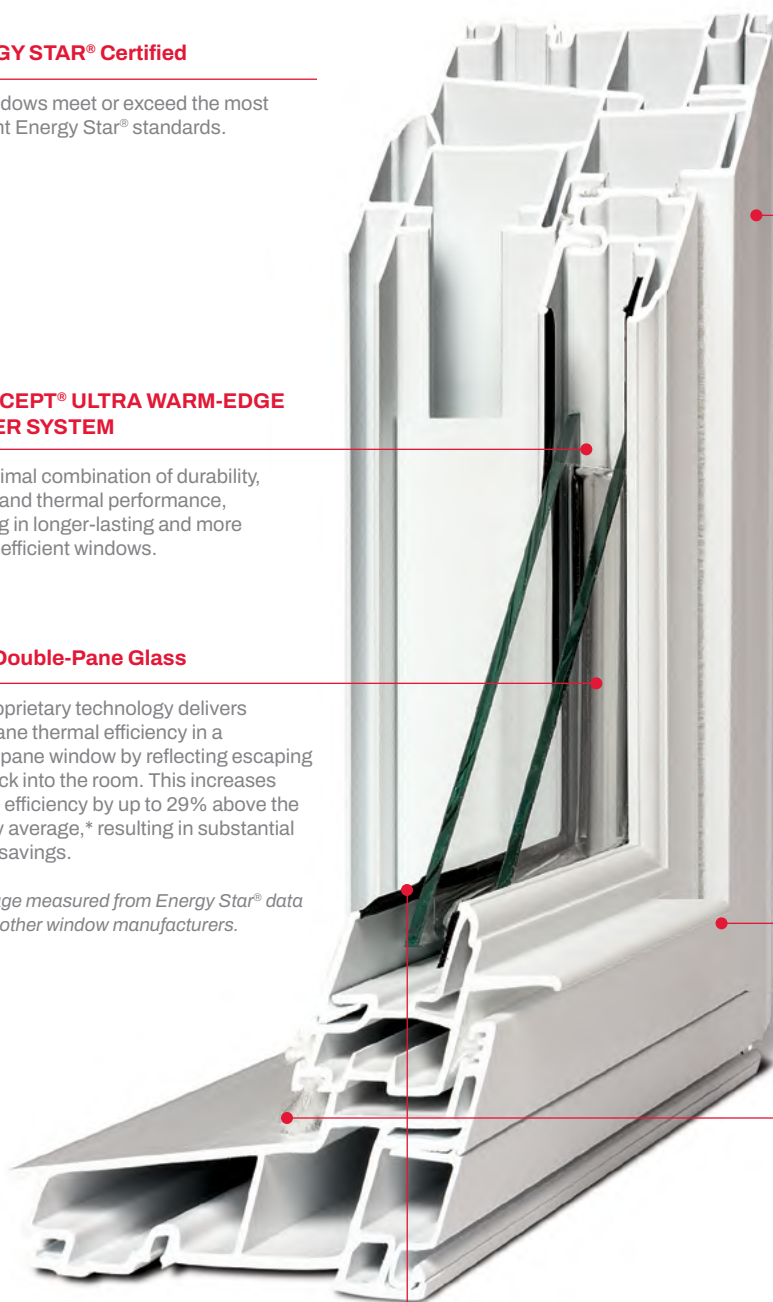

Fully Welded Sash & Frame

Provides exceptional strength and durability.

KP Air Sealing Technology

This technology offers unmatched air infiltration protection, reducing drafts by up to 24%** with a mold-resistant seal, guaranteed for life.

***Based on independent laboratory testing.*

The secret is in the Glass

Vertex3® high-performance glass technology is engineered to provide superior thermal efficiency, superior glass clarity and superior air infiltration protection.

Thermal Efficiency

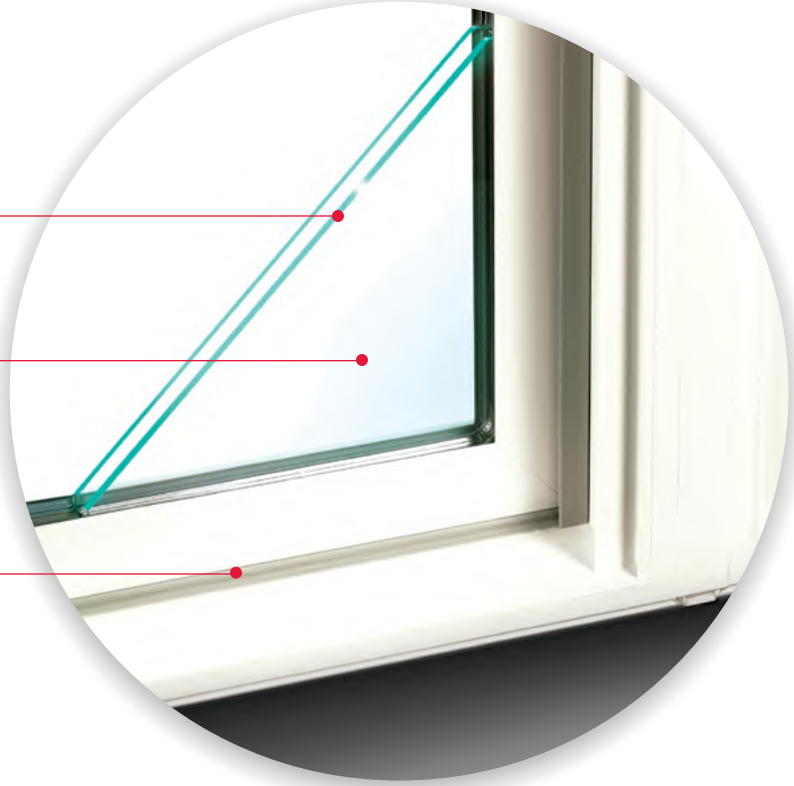

Outperforms the industry standard by 29%

Glass Clarity

Reduces water spots by 99%.

Air Infiltration Protection

Cuts drafts by up to 24%.

Windows Designed for Beauty, Glass Engineered for Comfort

Glass Option	About	Features
Vertex3® High- Performance Glass	Offers the best overall balance between insulation performance, solar heat, and light transmission. Includes ECTECHTechnology.	• Triple-pane performance in a dual-pane window • Energy Star® compliant in a dual-pane window • Light Transmittance: 78% • Blocks 80% of damaging UV rays • Cleaner, clearer windows • Reduces water spots by 99%
SOL-R® Gain 180	Ideal for capturing the sun's warming rays in winter, particularly well-suited for northern climates.	• One layer of Low-E coating • Good insulation performance • Maximum solar gain • Blocks 71% of damaging UV rays • Light transmittance: 79%
SOL-R® Shield Plus 366	Provides optimal insulation performance with moderate solar gain, reflecting the sun's heat in summer and reflecting the home's heat back into the room in winter.	• Three layers of Low-E coating • Superior insulation performance • Moderate solar gain • Blocks 95% of damaging UV rays • Light transmittance: 65% • High level of year-round comfort

All our high-performance glass packages are available in triple-glazed options for even greater performance. Our windows and patio doors meet Energy Star® standards.

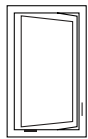

When Technology Meets Craftsmanship

Frames and glazing are engineered to maximize comfort and reduce energy costs, maintaining a cool interior in summer and a warm environment in winter.

Black Extruded Windows Built For Enduring Performance

Black extruded window finish offers enhanced durability and a seamless appearance. Our new black extruded window combines cutting-edge manufacturing with sleek aesthetics, ensuring long-lasting beauty and superior performance.

Industry-Leading Durability

The black colour is extruded throughout the profile, meaning it won't scratch off or fade over time.

Seamless, All-Black Finish

Unlike painted or laminated options, our design ensures no visible white when the window is open, creating a clean, modern look.

No Visible Hairline Scratches

Moving parts can cause fine scratches in traditional finishes, but our through-colour extrusion conceals surface wear, maintaining a flawless appearance.

Enhanced Aesthetics & Craftsmanship

No visible welding sprue in hard-to-reach corners, ensuring a refined and polished finish.

**The only Canadian manufacturer to offer
a black extruded window**

Why Black Extruded Windows?

Many designers and architects have embraced black windows for their **bold, contemporary appeal**, the perfect combination to the ever-so trendy modern farmhouse design. Our fully extruded black window stands apart not only in design but by offering **unmatched durability and seamless beauty** inside and out. Craftmanship and innovation all in one!

EXPERIENCE THE NEXT GENERATION OF BLACK WINDOWS

Built to last, designed to impress.

Windows & Patio Doors

PATIO DOORS

Windows & Patio Doors

A collection of patio doors is available, where design meets performance.

Carefully engineered to combine elegance, durability, and innovative technology, our patio doors invite natural light into any home while enhancing energy efficiency and comfort. With features like our high-performance Vertex3® technology for superior insulation and clarity, these doors deliver year-round performance without compromising style. From classic sliding designs to modern configurations, our patio door options are crafted to suit any architectural aesthetic and elevate any living space.

9500 Series, 7000 Series and 7600 Series Patio Doors

Our patio doors are designed with exceptional style and the highest level of security.

9500 Series

Features:

- Dual operating door reduces inventory by 50%.
- Available also in left or right operation.
- Available with mini-blind option.
- Vinyl extrusions 25% thicker than most other patio doors.
- Tested to withstand over 180 mph winds.
- DP55 rated.
- Energy Star® compliant.
- BC Energy Efficiency Standards Regulations (EESR) compliant with évolv Glass package (1.42 U-value).
- Dual pane: évolv Low-E, évolv 366 Low-E, Sol-R® Gain 180 Low-E, Sol-R® Shield Plus 366.
- Available in: 5ft and 6ft wide.

7000 Series Lift & Slide Patio Door

Features:

- Suitable for sash weights up to 880 lbs (5mm/6mm glass).
- Available up to 20 feet wide in a 2-panel design.
- Smooth and silent operation.
- Achieves a Commercial (CW) NAFS rating.
- Secure active multi-point locking at the mullion.
- “KD” knocked-down frame for easy handling – ideal for 12-foot+ openings.

7600 Series Easy Glide Patio Door

Features:

- Contemporary profile and smart hardware technology balancing aesthetics, function, and performance.
- Effortless operation, suitable for sash weights up to 880 lbs.
- Available in sizes exceeding 12 feet wide in a 2-panel door, and up to 20 feet wide in a 2-panel design.
- Secure with 12-14 active locking points.
- Superior performance against air, water, and noise infiltration.
- Smooth, silent operation.
- Achieves a Commercial (CW) NAFS rating.
- Dual or triple-glazed options with up to 6mm glass.

RESALE PRODUCTS

A complete range of exterior solutions is available for any project, including siding, rainware, trim, architectural accents, insulation, sealants, and nails, to provide everything required for a quality finish. Every detail is considered to ensure a comprehensive approach.

At Kaycan, we understand the importance of exteriors that are both beautiful and functional. Our expanded line of architectural accents helps achieve this balance. Featuring vinyl shutters, roof ventilation systems, gable and utility vents, window headers, door surrounds, and other finishing touches, our collection reflects our commitment to quality, innovation, and meeting the evolving needs of today's construction and renovation market.

Unparalleled Style and Versatility

Kaycan's decorative architectural products are available in a wide array of styles, colours, and sizes to perfectly complement any design. From classic to contemporary, these accents add character, dimension, and curb appeal.

Built for Ease and Durability

Crafted from lightweight yet durable materials, our products are designed for easy handling and installation. They seamlessly integrate with various exterior finishes, including wood, vinyl, aluminum, stucco, brick, and hardboard, saving time and effort while ensuring lasting beauty.

With Kaycan's decorative architectural solutions, it's not just adding accents—it's making a statement.

VINYL SHUTTERS

Vinyl shutters transform home exteriors effortlessly with vinyl shutters that combine the timeless beauty of wood with the durability and low-maintenance advantages of vinyl.

Kaycan Services

At Kaycan, we support our customers through every stage of their improvement projects. From easy-to-use online estimators and interactive design tools to expert-led consultations, we empower customers to visualize, plan, and execute their vision with confidence. Our online training keeps professionals up-to-date, while our recycling programs demonstrate our commitment to sustainability.

Kaycan Home Designer 2.0

Help customers visualize their dream projects with our intuitive design tool, Home Designer 2.0. This powerful platform allows you to showcase how Kaycan products can transform any property—all with just a few clicks. Simply upload a photo, and in moments, you'll bring their vision to life.

Home Designer 2.0

is now even more user-friendly, featuring cutting-edge technology and a comprehensive Professional Services Section. This updated version includes precise estimates, detailed measurements, and advanced 3D modeling.

Key Features:

- AI-powered detection for automatic masking and tracing.
- Pro Service Section with 3D rendering.
- Ability to apply palettes, products, and colours to present to your clients.

Getting started is easy – just use an address.

Discover Home Designer 2.0 by visiting our website.

Kaycan Connect

Available to our Retail Partners:

Get instant product information. Kaycan Connect addresses key retail challenges:

- **Reduced In-Store Labour:**
Customer assistance with a virtual Kaycan product expert.
- **Enhanced Staff Knowledge:**
Our live chat provides immediate answers to customer and associate questions.
- **Improved Lead Capture:**
Maintain customer engagement even after they leave the store.

How It Works:

Customers scan a unique QR code in-store to instantly chat with a Kaycan product expert.

Kaycan360

Kaycan360 is an efficient all-in-one resource platform, empowering you and your customers with the knowledge you need

Resource Centre

Quickly access a central platform where all essential information is at your fingertips. With easy search capabilities, you can seamlessly find answers to your questions.

Continued Education

Stay informed with on-demand knowledge, accessible anywhere, anytime. Kaycan360 centralizes valuable information to keep you up-to-date on our products, industry trends, and customer needs.

Onboarding and Retail Training Centre

From interactive training for new employees to tailored resources for existing team members, Kaycan360 makes learning easy and effective. Our Retail Training Centre fills knowledge gaps, develops staff into Kaycan experts, and ultimately drives sales. A well-trained team ensures a smooth sales process and delivers higher value to your customers.

Design Centers

Our exclusive Design Centers showcase our extensive range of building products, allowing customers to experience colours, textures, and styles in person. Designed to enhance product knowledge and inspire confidence, our Design Centers simplify product selection and strengthen client relationships.

Consultation Program

for the builders

Our Design Consultation Program provides builders with expert guidance on selecting colours, finishes, and profiles. We help create cohesive and visually striking designs for any development, ensuring projects meet the highest standards of quality and style.

What They Get:

- A consultation with the builder's team to gather detailed insights into their project vision.
- A selection of colour combination options tailored to their project using our products.
- A customized PDF booklet featuring their logo, designed to boost their confidence in making selections.

Why It Works:

- Provides enhanced customer service through a uniquely tailored experience.
- Increases your closing ratio by facilitating faster purchase decisions.
- Boosts client confidence in the appearance of their projects with Kaycan products, effectively answering the question, "How will it look on my project?"
- Offers valuable insights into project planning for neighbourhood developments.
- Equips them with a professional tool that can be shared within their organization.
- Enables them to visualize how our products integrate with other materials.
