

Built for Enduring Performance

Upgrade your home with the most durable black window finish on the market. Our new black extruded window combines cutting-edge manufacturing with sleek aesthetics, ensuring long-lasting beauty and superior performance.

Why Choose Our Black Extruded Window?

- **Industry-Leading Durability** – The black colour is extruded throughout the profile, meaning it won't scratch off or fade over time.
- **Seamless, All-Black Finish** – Unlike painted or laminated options, our design ensures no visible white when the window is open, creating a clean, modern look.
- **No Visible Hairline Scratches** – Moving parts can cause fine scratches in traditional finishes, but our through-colour extrusion conceals surface wear, maintaining a flawless appearance.
- **Enhanced Aesthetics & Craftsmanship** – No visible weld bead in hard-to-reach corners, ensuring a refined and polished finish.

Why Black Extruded Windows?

Many designers and architects have embraced black windows for their **bold, contemporary appeal**, the perfect combination to the ever-so trendy modern farmhouse design. Our **fully extruded black window** stands apart not only in design but by offering **unmatched durability and seamless beauty** inside and out. Craftsmanship and innovation all in one!

Experience the next generation of black windows—built to last, designed to impress
