CREATOR OF LUMINOUS SPACES

Fabelta is a Quebec-based manufacturing company that develops, manufactures, sells, and installs a wide range of high-end, custom-made fenestration products since **1957**

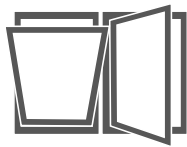

Our purpose is to develop fenestration solutions that allow our clients to create luminous spaces. It is with this mindset that our team members contribute every day to the realization of your unique projects. Our dedicated and passionate teams will support you throughout your project, from its design to its completion.

PURE FIXED

ATELIER BOOMTOWN | © RAPHAËL THIBODEAU

PURE WINDOW

- 6 to 11.5 inch frame for better positioning in the warm part of the wall
- 1.5 inch thermal barrier reducing conductivity
- Roll-forming/pressing assembly maximizing structural and sealing performance
- Wide range of interior and exterior color options
- Custom dimensions for a personalized product
- Snap-fit gasket to glazing for easy maintenance or replacement
- 1.4 mm aluminum extrusions for superior structural quality
- Pre-drilled product for a seamless installation with no visible screws

PURE DOOR

- 6 to 11.5 inch frame for better positioning in the warm part of the wall
- 1.5 inch thermal barrier reducing conductivity
- Wide range of interior and exterior color options
- Custom dimensions for a personalized product
- Ergonomic handle and multi-point locking system for a watertight and secure door
- Non-slip threshold protecting the door's sealing structure
- Water drainage openings (rain screen principle) ensuring effective water expulsion
- Commercial-grade hinges for increased durability
- Optional opening limiter, restricting the opening to 90 degrees without the need for a doorstop.
- Pre-drilled product for a seamless installation with no visible screws

PURE HERITAGE SERIES

ALUMINIUM WINDOW WITH A GUILLOTINE APPEARANCE

The Pure Heritage window will allow you to have a sash appearance, while getting the best energy efficiency.

This assembly, composed of a fixed shutter and an interior operator of your choice, responds to the growing demand for repairs that must maintain the requirements of the original design while meeting current standards and performance.

Our 3 3/16 inch flat mullion can divide this assembly according to the proportions of your design and create the aluminium sash look you desire.

GLASS TO GLASS

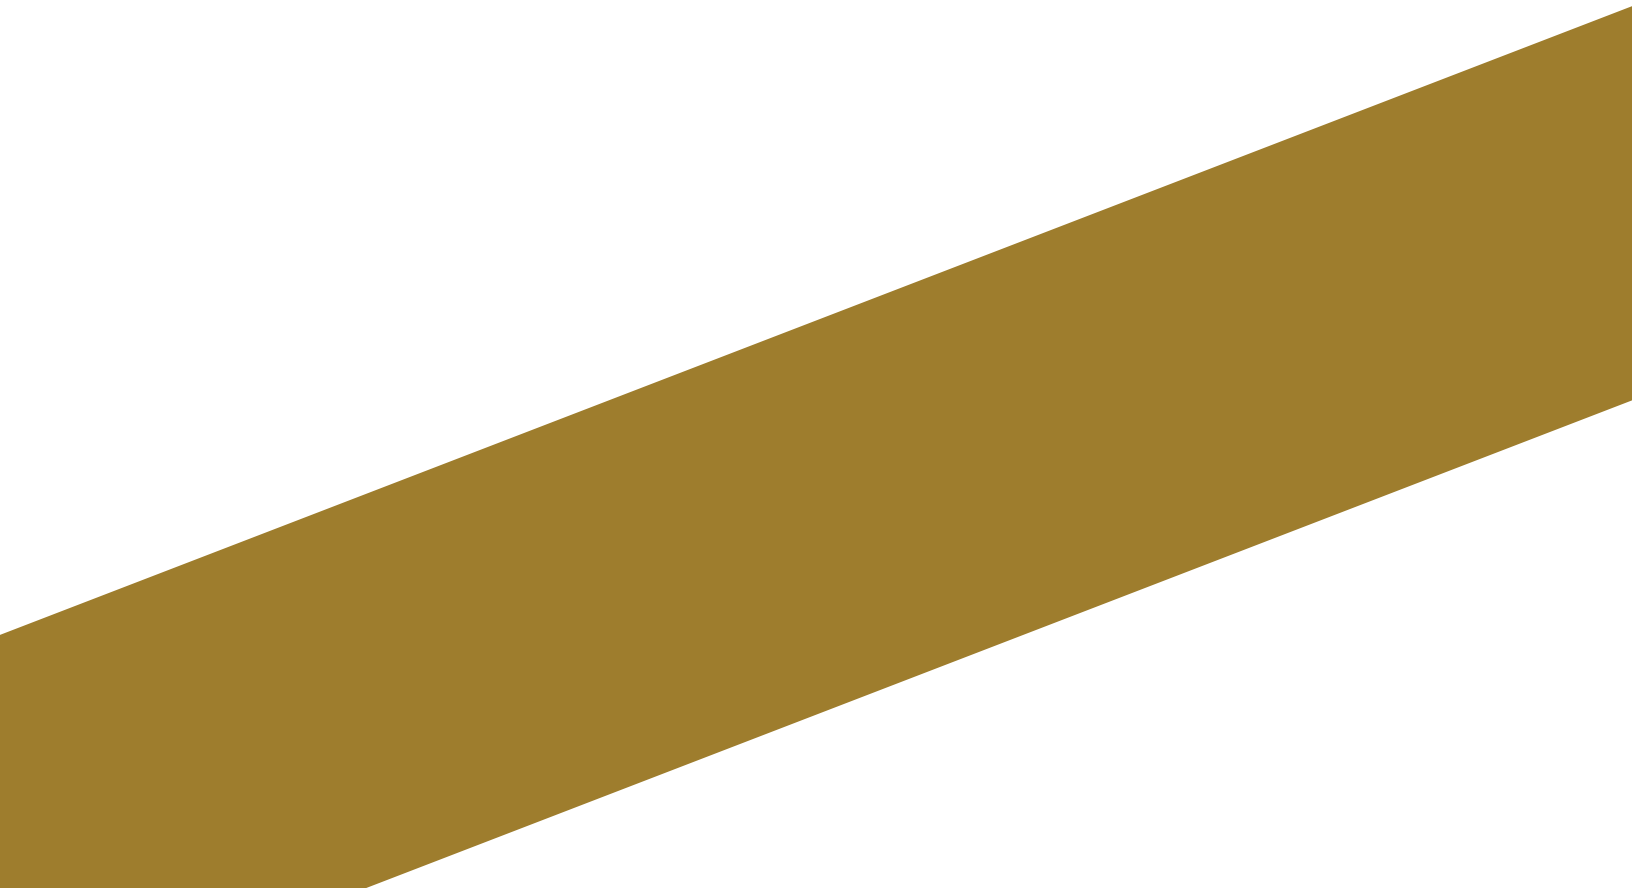

FIXED ALUMINIUM WINDOW

The puRE panoramic window - inline glass-to-glass configuration uses the frame of our standard fixed puRE window, with adjacent glazing units installed side by side.

This design provides a continuous window width with no vertical mullions, delivering an expanded sightline. The assembly ensures a clean finish and optimal performance while meeting durability and energy-efficiency requirements

ALSO AVAILABLE : GLASS CORNER

The puRE panoramic window – glass corner configuration offers a 90-degree glazed junction without a structural post, achieved through direct glass-to-glass bonding at the corner. Aluminium corner trims provide both interior and exterior finishing, ensuring a clean, durable aesthetic and maximum visual openness.

ALLURE WINDOW

- 6 inch frame for better positioning in the warm part of the wall
- 1.8 inch thermal barrier reducing conductivity
- Durable, removable sealing component for easy replacement
- Double row of removable weatherstrips for superior sealing and easy replacement
- Minimalist 5/8 inch frame and contemporary 1 7/8 inch sash for maximum brightness
- Adjustable opening mechanism securely screwed into the aluminum extrusion. Large sashes include a third articulated arm for durable operation
- Opens up to 90 degrees for cleaning from the inside
- Pre-drilled in factory product for a seamless installation with no visible screws

URBANIA-PEX STEEL DOOR WITH WOOD FINISH

URBANIA-PEX WOOD DOOR

STEEL ENTRY DOOR WITH WOOD FINISH

The URBANIA-PEX door combines a steel body with a real wood exterior finish. Available in birch or walnut, it comes in several colors for full customization.

- 22-gauge steel door with real wood cladding
- Wood species available: birch and walnut
- Frame depth options from 5 1/4 in to 13 1/4 in
- Interior and exterior finishing frame with retaining moulding
- Wood grain can be vertical or horizontal
- Astragal available
- Optional grooves (paneling) in the wood for a more contemporary look
- Wood exterior and steel interior

ENNOVA SERIES

ALUMINIUM SLIDING WINDOW

- 6 or 7.5 inch frame
- Sliding shutters on casters for easy use
- No visible hardware
- Sealed units tested up to 200lbs for large openings
- Roller mosquito screen with an aluminum frame and brush positioned between two rows of shutters

OPTIONS

- Energy Star
- Interior and exterior extensions
- Drywall molding

COMPLEMENTARY PRODUCTS

HYBRID WINDOW AND PATIO DOOR

HYBRID EXTERIOR CASEMENT AND OUTSIDE AWNING

- Multi-chamber profiles
- Welded frames and shutters
- Shutters open to 90° for easy cleaning
- Stainless steel operator with folding handle
- Double or triple sealed units
- Aluminum exterior frame
- Frames of 5 3/4 in (4 5/8 in + 1 1/8 in aluminum), 6 5/8 in

HYBRID SLIDING / SASH

- Multi-chamber profiles
- Structural fabrication for guillotine windows
- Tilting mechanism for operable shutters that swings inward for easy cleaning
- Double or triple sealed units
- Automatic latch with a closure indicator
- Durable chrome rollers integrated into shutters for sliding windows
- Spring hardware system for smooth shutter opening
- 7 1/8 in frame (6 in + 1 1/8 in aluminum)

HYBRID SLIDING PATIO DOOR

- Wood / PVC / aluminum frame | PVC / aluminum shutter
- Unmatched durability of an exterior construction in extruded aluminum
- Superior energy performance due to the combination of exterior aluminum and interior PVC
- A wide variety of configurations available
- Tandem casters for maximum ride smoothness and ease of operation
- Integrated white or gray blind available
