The SBP Story:

At one time we were known as Creative Glass Studio. We primarily offered sales & service in stained glass; proudly working as a leading local glass retailer and specializing in window restorations for churches in Northumberland County.

Over the years the business expanded its material offerings to include more quality products for residential and commercial construction. This expansion propted us to proudly rebrand under the family name.

“Stevenson Building Products.”
Family owned and operated since 1979.

At SBP we carry an extensive line of exterior and interior products to help you with your next project. Our team is equipped with the knowledge and experience to facilitate your needs effectively.

Our Mission has always been to ensure that every customer leaves our establishment knowing that we genuinely care about their projects just as much as they do. We understand that each project you undertake is important, and we strive to provide the attention and dedication necessary to ensure your success.

Thank you for allowing us and trusting us to be part of your Journey.

NEW DESIGN

The Shaker-Slat Two and Shaker-Slat Four

The horizontal rectangular embossing of Shaker-Slat Two has a charming wooden plank effect. It both has the charm of yesteryear's swing doors while being less busy and more soothing to the eye than the vertical plank effect often seen with these types of doors.

NEW DESIGN

The Princeton P-31

The Princeton P-31, the first steel garage door with continuous molding on the panoramic window section. A WOW look every time! The newest arrival to the Townships Collection, it pays tribute to those swinging garage doors of yesteryear. The beauty of wood without its inconveniences.

NEW COLORS

Iron Ore and Dark Walnut Faux Wood

Iron Ore will thus enhance the exteriors of today's most contemporary home styles. Dark Walnut, Faux Wood combines the richness of wood grain with a deep, soothing brown that anchors your home to the landscape with its earthy appeal.

NEW WINDOW

The Slim Window

With its clean, smooth and no-frills rectangular shapes, its modern frame is perfect for the sleek look sought after in the latest exterior trends. The Slim Window comes in 40"x7". Quite a revolutionary size since it's half the height of traditional windows on garage doors.

BUILDING PRODUCTS

BLACK VINYL SIDING

Arizona Heat Test Performance

Protected

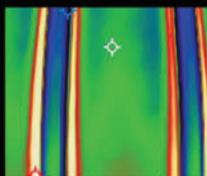

- Stored in a box at testing facility
- Manufactured with proprietary black pigment technology
- PVDF film applied to exposed panel for superior fade resistance

Exposed

- 110+ consecutive days in desert conditions exceeding 40°C
- Discolouration to the nail hem (area not protected by PVDF film)
- Exposed panel remains visibly unchanged

Heat Build

Con: 144.3°F
Max: 156.0°F
Min: 130.1°F

Tested over 110+ consecutive days in desert conditions exceeding 40°C.

Degree of Colour Change

*Lower Delta E value is better

Black with PVDF film outperforms all tested solid colours.

SmartSide®

ExpertFinish TRIM & SIDING

Lighter Weights:

LP SmartSide lap siding weighs 45% less than fiber cement lap siding.

Longer Lengths:

LP SmartSide siding's 16-foot lengths may lead to fewer seams and cuts, compared to fiber cement's 12-foot lengths.

Advanced Durability:

LP SmartSide siding is less prone to breakage than fiber cement, helping to reduce waste by 7%.
